

3 SWIVEL LAYOUT

DESIGN GUIDELINES

H and A > $M \cdot L1 / S \cdot Z$
 S = Allowable Stress
 $A = \Delta y / (\sqrt{2} \tan(\theta/2))$ $B = \Delta y / 2 \tan \theta$
 $\Delta x = \sqrt{A^2 + \Delta y^2 / 4} - A$

THESE GUIDELINES ARE SUGGESTED AS A STARTING POINT WITH DESIGN. SIGNIFICANT INCREASES IN A, B, AND H DIMENSIONS MAY BE REQUIRED TO SATISFY PIPING STRESS CODE COMPLIANCE. MINIMIZING DIMENSIONS L1 AND L2 IS CRITICAL. IT IS THE ENGINEER'S RESPONSIBILITY TO VERIFY OVERALL DESIGN AND CODE COMPLIANCE.

2 SWIVEL LAYOUT

DESIGN GUIDELINES

A > $M \cdot L1 / S \cdot Z$
 S = Allowable Stress
 $\theta = 15^\circ$ TO 30°
 $A = \Delta y / (\sqrt{2} \tan(\theta/2))$ $\Delta x = \sqrt{A^2 + (\Delta y / 2)^2} - A$

IMPORTANT: Consider Δx in piping design. This movement is a large rotation effect not included automatically in linear stress analysis software.
